

Jin Global
Jinghui Hardware Co., Ltd.

PRODUCT CATALOGUE

Premium Hardware Behind Everyday Fashion

2026

jinglobal.co

About us

Our Story

Our story begins in **Guangzhou, China**, where our parent facility, **Jinghui Hardware**, has been crafting custom hardware for bags, backpacks & luggage for over 20 years.

In 2025, we took a strategic step by establishing **Jin Global in the Netherlands**. This dual-presence allows us to seamlessly bridge our manufacturing excellence in Asia with the complex design, communication, and eco-compliance (REACH/RoHS) needs of our European and global partners.

What We Offer

Metal hardware remains at the center of our work. Accessories such as charms straps are natural extensions of our core capabilities.

Leveraging our reliable supply chain and international experience, we deliver solutions that unlock your products' full potential.

Design | Custom Project | OEM | ODM

Raw Materials

ZAMAK (ZINC ALLOY) IS ECO-FRIENDLY & 100% RECYCLABLE.

MULTIPLE OPTIONS TO PREVENT CORROSION & IMPROVE AESTHETICS

Surface Finishes

Quality Control

**TESTS TO ENSURE COMPLIANCE WITH REGULATIONS
E.G. REACH AND ROHS**

**WE ARE COMMITTED TO A SAFE AND FAIR
WORKPLACE, WITH ONGOING IMPROVEMENTS IN
EMPLOYEE WELL-BEING.**

Staff Care

Ordering Information

Our catalog is continuously being updated, with more products added regularly. OEM/ODM inquiries are welcome. **Feel free to send us your drawings or requirements, and we will be happy to recommend suitable products.**

- All products are **made to order**.
- All catalog products are manufactured using existing molds; **no tooling fee** is required.
- For **customized products** requiring new molds, the tooling fee typically ranges from USD 100–300. **Minimum order quantity (MOQ)** depends on the specific product. Please contact us [*jinglobal.contact@gmail.com*](mailto:jinglobal.contact@gmail.com) for details.
- **Free samples** are available for products currently in production. If a sample is not available, the sampling fee is USD 50 per item. Shipping costs are borne by the customer.

SURFACE FINISHES

Electroplating(galvanic treatments): An electrochemical process that uses direct current to deposit a thin layer of metal onto a conductive substrate, enhancing properties like corrosion resistance, wear resistance, electrical conductivity, and aesthetics.

Colors: Nickel; Gunmetal; Chrome; Silver; Gold; Copper; Tin; Nickel-Free; etc.

Texture: Satin; Brushed; Antique;

Gloss Level: Glossy(Default); Matt;

Physical Vapor Deposition (PVD): A versatile vacuum coating process used to produce thin films by transitioning solid material into a vapor phase and condensing it onto a substrate.

Colors: Nickel; Gunmetal; Chrome; Silver; Gold; Copper; Tin; Nickel-Free; etc.

Texture: Satin; Brushed; Antique;

Gloss Level: Glossy(Default); Matt;

Baking paint (baked enamel): A surface treatment process that solidifies paint through high-temperature baking. The core steps include spraying paint and baking in a high-temperature oven (usually 60 ° C~200 ° C), allowing the paint film to quickly harden and form a durable and smooth surface.

Colors: Black; White; Beige; etc.

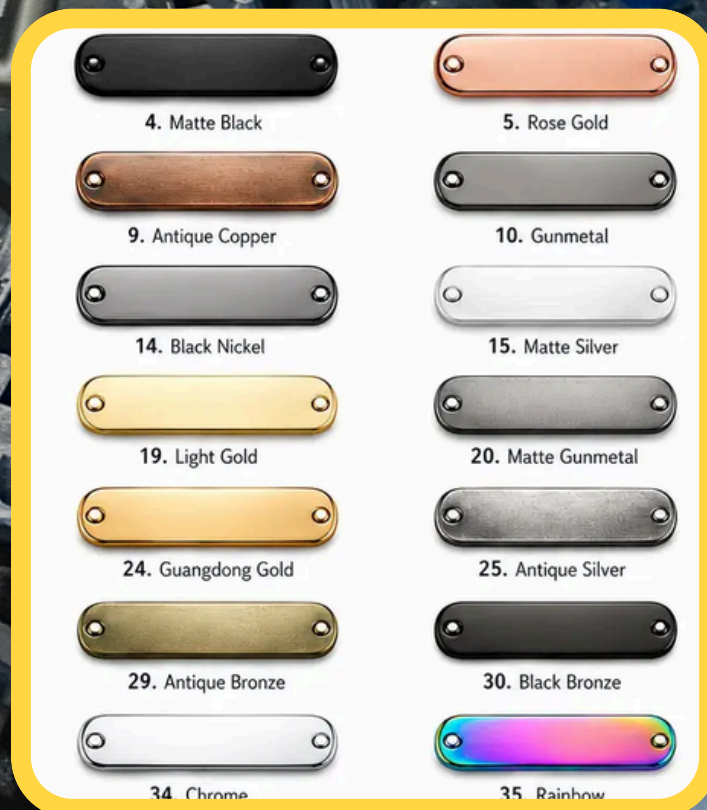

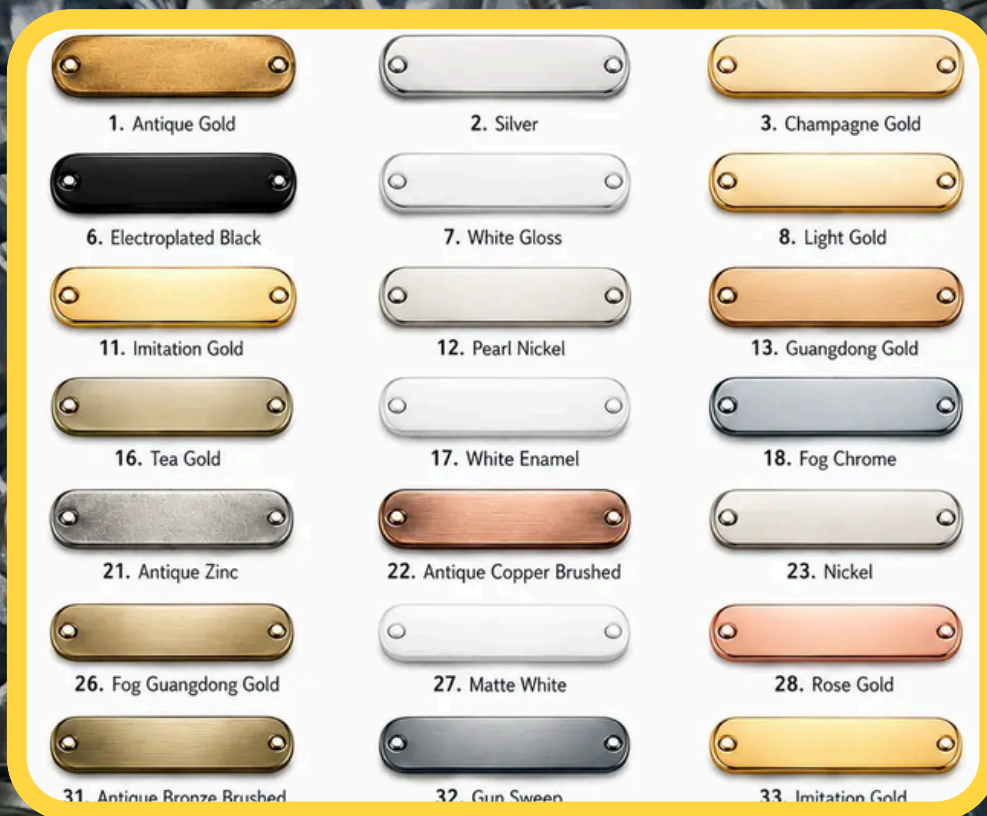

Gloss Level: Glossy(Default); Matt;

E-Coating (electrophoretic painting): A high-tech process in which metal components are covered in a protective finish by submersing them in a chemical bath and applying an electrical current.

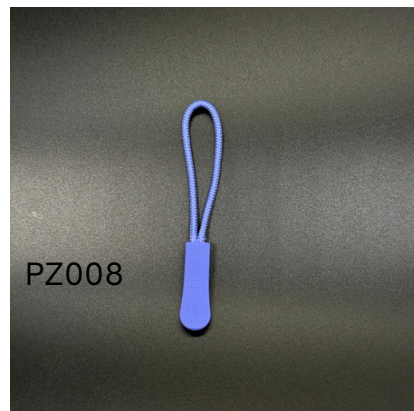

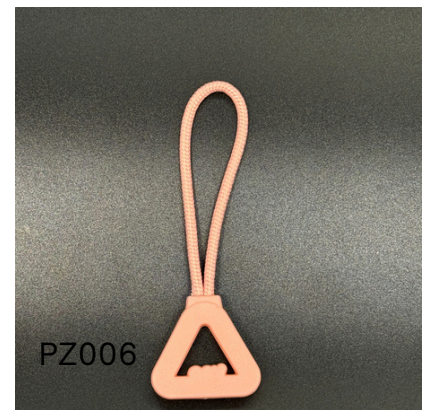

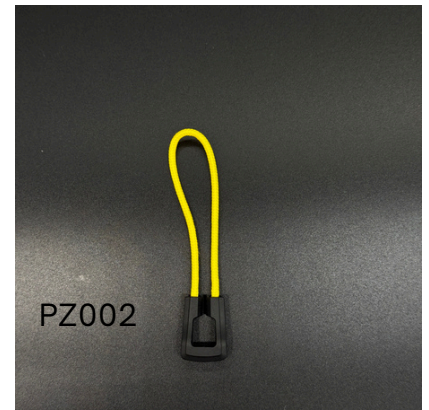

Colors: Black; ●

Gloss Level: Glossy(Default); Matt;
